Turtles Against Plastic Straws
The Turtle Committee is taking action against the massive buildup of straws in our neighborhoods. Our spokesperson will address the issue shortly.
Turtle
Follow us next week for a riveting review on straws!
In the meantime, join the movement and help us reduce single-use plastics.

3 easy swaps to try today
Reusable straw
Toss one in your bag.
Sip lid
No straw needed.
Just say "no"
Skip it when you can.
Pick a plan (tap a tab)
Works in some email clients. If not, all tips are still listed below.
Home
School
Work
Home plan
Add "no straw" to delivery notes, and keep 1 reusable straw by the sink.
School plan
Ask your cafeteria for straw-on-request and share this email with a club.
Work plan
Request a straw-free default in the kitchen and switch to sip lids for events.
Fallback tips:
Home: "no straw" notes + 1 reusable straw by the sink.
School: straw-on-request + share with a club.
Work: straw-free default + sip lids for events.

Gmail (web + mobile apps)

• Media queries are supported but can be inconsistent depending on app/platform; sanitization can
impact complex selectors.
• Hover effects are limited (mobile has no hover). Keyframe animations are commonly unsupported.
• Form elements (radio/checkbox) can work, but interactivity may be reduced; fallback content is important.

Outlook for Windows (Word engine)

• Most fragile for modern CSS. Media queries and advanced CSS are often limited.
• CSS background images are commonly unreliable; use VML bulletproof background patterns if a
background image is critical.
• Radio/checkbox interactivity is partial; expect the tabbed section to degrade to the all-panels-visible
fallback.

Yahoo Mail / Samsung Mail

• Baseline HTML/CSS is usually fine; hover and keyframes can be partial depending on platform.
• Plan for graceful degradation.
